Bulkhead Emergency Light is a type of emergency lighting fixture that is designed to be mounted on walls, ceilings, or bulkheads to provide illumination during power outages or emergency situations. These units are enclosed in robust, weatherproof, and often impact-resistant housings, making them suitable for both indoor and outdoor applications, particularly in industrial, commercial, and transportation environments. The design typically features a sealed structure to protect internal components against dust, moisture, and mechanical damage, ensuring long-term durability and reliability. Bulkhead emergency lights can operate in maintained or non-maintained modes and are often equipped with LED light sources for energy efficiency and longer lifespan. They include built-in rechargeable batteries and automatic activation systems that switch on the light when main power fails. Typical applications include stairwells, corridors, warehouses, marine vessels, tunnels, and utility rooms where visibility and safety must be maintained during emergencies.
