Bullet cameras are named by their distinct cylindrical shape, which looks like a bullet shell or lipstick tube. As one of the most common types of security cameras, bullet cameras are a visible deterrent and they can be installed indoors and outdoors. Bullet cameras are known for their longer outside casing, giving these surveillance cameras a distinguished and noticeable presence. Due to this form factor, bullet surveillance cameras can typically house a larger lens, making them an excellent outdoor camera capable of providing higher levels of detail over greater distances. This also lends itself to extended night vision for larger outdoor areas such as parking lots and traffic intersections.
