A bulletproof vest, also known as a bullet-resistant vest or ballistic vest is a type of personal protective equipment. It is used by the military, law enforcement personals, and many times by civilians as a protective cover against bullets and shrapnel from explosions. Soft bulletproof vests weigh less and provide protection against small-caliber handguns. Hard bulletproof vests are used in combat, high-risk tactical missions, and hostage rescue missions.

The soft vest is made of different layers of woven and laminated fibers that protect soldiers, security guards from shotgun, small caliber hand gun, and explosives. Ballistic plates are often inserted inside the soft vests. In addition, metal plates can be used with soft vests, thereby providing extra protection against rifles and knife stabbing. These vests use different layers of strong fibers that bends bullet, spreading its force over a wider portion of the fiber thus growing the bullet into a dish shape.
