Bus Intelligent POS Terminal is used to realize more convenient public transportation payment service for users. It provides value-added services such as real-time settlement of bus ride fee system, passenger flow big data analysis, and vehicle dispatch operation management technical support for bus operation managers.

Traditional bus coin machines only support buying tickets by coins or transit cards. Among them, there are major drawbacks to changing coins to buy tickets: Inconvenient cash change, large cash collection and management workload, cash transportation, and extremely high reconciliation management costs. In order to solve the shortcomings, smart bus billing machines began to be noticed by bus companies. Smart bus fare collection devices support mobile payment such as WeChat Pay and Alipay. It's beneficial for reducing currency usage and labor cost and making clear the payment account management.
