In 2025, the global production of bus QR code scanners reached 310,000 units, with an average selling price of US\$715 per unit. Bus QR code scanners are onboard front-end ticket verification terminals in public transportation automatic fare collection systems. They are also compatible with NFC/RFID transportation cards and cEMV bank cards/mobile wallets, completing a full set of ticket verification actions including ticket recognition, transaction verification, fare deduction or accounting, voice/light feedback, transaction uploading, blacklist/whitelist verification, and linkage with the back-end clearing and ticketing system. Application scenarios include city buses, BRT, suburban buses, and park/airport shuttle buses. The upstream of the industry chain mainly consists of 2D barcode/QR code scanning modules, NFC/RFID reader/writer modules, EMV payment kernels and security authentication, SAM/security modules, processors, storage, displays, buzzers, 4G/Wi-Fi/GNSS communication modules, automotive-grade power supplies, and protective housings. The midstream consists of OEMs; the downstream includes bus groups, transportation authorities, ticketing clearing platforms, acquiring banks/card organizations, MaaS/App service providers, and operation and maintenance service providers. Gross profit margin is approximately 15%-35%.
