A button sound book is a type of interactive children's book that features buttons or touch-sensitive panels integrated into the pages. Each button corresponds to a specific sound effect, music clip, or spoken narration that enhances the reading experience. When children press these buttons while reading, they can hear sounds that complement the story or provide additional context to the illustrations. Button sound books are designed to engage young readers by stimulating their auditory senses and encouraging interaction with the book. They are often used to introduce children to reading and storytelling in a fun and immersive way.

The global Button Sound Book market size is projected to grow from US$ million in 2024 to US$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
