Abstracts

The global Buy and Sell Online Business market size is predicted to grow from US\$ 1130 million in 2025 to US\$ 2573 million in 2032; it is expected to grow at a CAGR of 12.6% from 2026 to 2032.

A Buy and Sell Online Business refers to a business model in which products or services are purchased (either from suppliers or directly from manufacturers) and then sold to customers through online platforms. The business is conducted entirely over the internet, leveraging digital channels such as e-commerce websites, online marketplaces, or social media to facilitate transactions. The main goal is to generate profit by purchasing items at a lower price and selling them at a higher price to consumers, typically without requiring a physical store or office.

This business model has gained immense popularity due to the rise of e-commerce platforms and the growing trend of online shopping. It is suitable for entrepreneurs looking to start a business with relatively low overhead costs, as they do not have to invest in a physical storefront or extensive infrastructure.

The Buy and Sell Online Business market is not a monolith. Its underlying engine—the e-commerce platform—is a huge market that is growing rapidly as global businesses invest in complex, AI-driven headless digital storefronts. Alongside this, a vibrant, tech-driven M&A brokerage industry has emerged, fueled by demographic shifts and AI, which specializes in trading these very online businesses as valuable assets. The common thread is technology enabling commerce, whether creating new businesses or facilitating their sale.
