Cable Organization Kit is a set of components designed for organizing, securing, and managing cables, wires, and harnesses. It typically includes cable ties, clips, routing channels, sleeves, and fastening accessories to optimize wiring structure, reduce tangling risks, and improve cleanliness and safety of internal and external cable layouts. It is widely used in consumer electronics, data centers, industrial equipment, and automotive electronics.

At the same time, the market is shifting toward modular, standardized, and high-density cable management solutions driven by data center expansion, increasing device complexity, and electrification in automotive systems. Cable organization kits are evolving from basic cable tidying tools into system-level infrastructure solutions that support higher power loads, more complex architectures, and improved reliability in advanced electrical systems.
