The cable stainless steel strand splice is used to connect or repair guy wire or messenger strand. The strand splice has a rated holding strength which is equivalent to the rating of the wire or strand to which it is applied. Splices can be used to form a stopper at the end of a line, to form a loop or an eye in a rope, or for joining two ropes together. Splices are preferred to knotted rope, since while a knot typically reduces the strength by 20–40%, a splice is capable of attaining a rope's full strength.
