Calamari oil is sourced from food grade squid and contains the highest source of DHA. Calamari or squid oil is rich in Omega-3 fatty acids or polyunsaturated fatty acids (PUFAs) which are essential in normalizing one's metabolism. There are 3 types of omega-3 fatty acids, one is found in plant oils and the other two are found in marine oils. These are alpha-Linolenic acids (ALA), which are found in plant oils, Eicosapentaenoic acid (EPA) and Docosahexaenoic acid (DHA), both found in marine oils. Krill oil and fish oil combined would still not equal to the Omega-3 fatty acids found in calamari oil. Squid oil is specifically rich in DHA, which is good for your total health, brain, skin, heart, eyes, and nervous system.
