The global Canned Dog Foods market size is predicted to grow from US\$ 11035 million in 2025 to US\$ 15220 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global sales volume of canned dog foods is estimated at approximately 2.4 million tons, with an average selling price of around USD 4,700 per ton. Canned dog foods are wet dog food products manufactured using metal can packaging, thermal sterilization processes, and high-meat-content formulations, mainly used for daily canine feeding, high-palatability feeding, and functional nutritional supplementation applications. These products are typically formulated with meat, animal by-products, fish ingredients, grains, vitamins, minerals, and functional nutritional additives, while utilizing sealed canning and commercial sterilization technologies to achieve long shelf life under room-temperature storage conditions. Compared with traditional dry dog food, canned dog foods offer advantages such as higher moisture content, stronger palatability, higher protein levels, and easier chewing and digestion. As a result, they are widely used for puppies, senior dogs, premium pet feeding, and specialized health management applications. Product structures generally include animal protein systems, stabilizer systems, nutritional enhancement systems, and metal can packaging systems. Different products vary significantly in meat content, functional positioning, nutritional formulation, packaging size, and shelf-life capability. The industry is currently evolving toward higher fresh meat content, higher protein formulation, natural ingredients, grain-free recipes, and functional nutrition.

From a market structure perspective, canned dog foods represent an important segment within the global wet pet food market, with demand mainly driven by pet humanization trends, premium pet consumption upgrades, and rising canine health management awareness. North America and Europe remain the world's largest consumption markets, while Japan and China's tier-one cities serve as the core

premium consumption regions in Asia. Due to advantages in palatability, hydration support, and high-protein nutrition, canned dog foods continue maintaining stable demand in premium staple food, functional pet food, and senior dog feeding applications. The industry requires strong capabilities in meat supply chains, food safety management, canning sterilization technology, nutritional formulation, and packaging management. The market is currently dominated by large Western pet food groups, Japanese pet food companies, and selected premium Chinese domestic brands, with leading suppliers maintaining strong advantages in fresh meat formulations, functional nutrition, and global distribution networks. With increasing pet aging trends, indoor dog ownership, and premium feeding demand, the market is evolving toward high-protein, hypoallergenic, grain-free, functional nutrition, and prescription-based formulations, driving growing demand for gastrointestinal management, joint care, immune health, and weight management products. At the same time, fresh dog food, freeze-dried dog food, and pouch wet food are creating competitive pressure in certain premium market segments, especially as pouch wet food has recently grown faster than traditional metal can products. However, canned dog foods continue maintaining an important position in the global wet dog food market due to mature supply chains, established feeding habits, and stable shelf-life capability. In the future, continued expansion of the global pet economy, premium pet consumption upgrades, and increasing penetration of online pet retail channels are expected to support stable market growth for canned dog foods. Regionally, the United States, Europe, China, and Japan remain major consumption regions, while Thailand, China, the United States, and selected European countries serve as core manufacturing bases. The industry primarily operates through supermarkets, e-commerce platforms, veterinary hospitals, and professional pet retail channels.

LP Information, Inc.
