Caprolactam (CPL) is an organic compound with the formula (CH2)5C(O)NH. This colourless solid is a lactam (a cyclic amide) of caproic acid.

Nylon 6 fibers are increasingly used in the automotive sector in tire cord manufacture, engine covers, gears, and bearings, owing to their intrinsic properties, such as great tensile strength, durability, and fatigue resistance. Caprolactam is increasingly replacing metals in various automotive applications, such as air intake manifolds in the nylon 6 resin. Therefore, the growing automotive sector is expected to drive the industrial yarns market, which in turn, will drive the caprolactum market.
