The global Car Camping Tents market size is predicted to grow from US\$ 605 million in 2025 to US\$ 976 million in 2032; it is expected to grow at a CAGR of 7.3% from 2026 to 2032.

Car camping tents are crafted for outdoor adventures that take place close to the road. This tent style is designed to prioritize comfort over portability, as you generally won't need to carry them more than a few dozen feet from your car to your campsite. In 2025, global Car Camping Tents production reached approximately 1236 k units, with an average global market price of around 500 US\$/Unit. The production capacity of Car Camping Tents reaches 1500 k units, and the industry's gross profit margin is approximately between 20% and 40%.

The car camping tent market continues to grow, primarily driven by multiple factors, including the rise of global leisure camping and self-driving tours, increased demand for comfort and space in outdoor living from families and groups, increasingly improved camping infrastructure, the popularization of camping lifestyles through social media, consumer preferences shifting from traditional hotels to micro-vacations closer to nature, and continuous innovation in tent products in terms of ease of use, functional integration, and aesthetic design. At the same time, the post-pandemic emphasis on open spaces and private travel has further accelerated the transformation of this category from professional outdoor equipment to mass-market consumer products.
