Car design is the process of developing the appearance, and to some extent the ergonomics. The job of car designers is to create new automobiles. These design professionals are responsible for different processes?exterior design to define the outer appearance of the car, interior design that covers everything from the overall look of the vehicle to the details of the seats, steering wheel and instrument panel, and color design to decide the tones for the body and interior. Working together and combining their talents, they create a new automobile. Car designers start with a product concept developed by the product planning department. This gives them an idea of the type of vehicle to be made. After receiving information and explanations based on market surveys, they take their ideas for a vehicle that matches the conceptual plan and begin working to transfer these ideas into a design.
