Sound insulation cotton is mainly used to absorb medium and high frequency noise. It is generally used in places with cavities, such as door panels and various interior panels. The types of sound-absorbing cotton can be roughly divided into three categories: Baisha cotton, high-density cotton and memory cotton. The relative cost of Baisha cotton is relatively low, and it is also the longest choice for the original car. The high-density sound-absorbing cotton has a relatively high cost and is mainly used in some parts that need to bear a certain pressure, such as the chassis.
