The global Carbon Offset/Carbon Credit Trading Service market size is predicted to grow from US\$ 194 million in 2025 to US\$ 185 million in 2031; it is expected to grow at a CAGR of -0.8% from 2025 to 2031.

Carbon offsets are measured in metric tons of carbon dioxide-equivalent (CO₂e) and may represent six primary categories of greenhouse gases: carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), perfluorocarbons (PFCs), hydrofluorocarbons (HFCs), and sulfur hexafluoride (SF₆). One carbon offset represents the reduction of one metric ton of carbon dioxide or its equivalent in other greenhouse gases.

There are two markets for carbon offsets. In the larger, compliance market, companies, governments, or other entities buy carbon offsets in order to comply with caps on the total amount of carbon dioxide they are allowed to emit. This market exists in order to achieve compliance with obligations of the Kyoto Protocol, and of liable entities under the EU Emission Trading Scheme.

In the much smaller, voluntary market, individuals, companies, or governments purchase carbon offsets to mitigate their own greenhouse gas emissions from transportation, electricity use, and other sources. For example, an individual might purchase carbon offsets to compensate for the greenhouse gas emissions caused by personal air travel. Many companies offer carbon offsets as an up-sell during the sales process so that customers can mitigate the emissions related with their product or service purchase (such as offsetting emissions related to a vacation flight, car rental, hotel stay, consumer good, etc.).

Global Carbon Offset/Carbon Credit Trading Service key players include South Pole Group, Aera Group, Terrapass, etc. Global top three manufacturers hold a share nearly 20%.

Europe is the largest market, with a share about 40%, followed by USA, and South America, both have a share about 40 percent.

In terms of product, REDD Carbon Offset is the largest segment, with a share about 40%. And in terms of application, the largest application is Industrial, followed by Household, Energy Industrial, etc.
