The global Carburetors market size is predicted to grow from US\$ 1129 million in 2025 to US\$ 1215 million in 2031; it is expected to grow at a CAGR of 1.2% from 2025 to 2031.

Carburetor is the device inside an internal combustion engine that provides the area for air and gasoline to mix them together so that the engine runs properly. If there is not enough fuel mixed with the air, the engine "runs lean" and either will not run or potentially damages the engine. If there is too much fuel mixed with the air, the engine "runs rich" and either will not run (it floods), runs very smoky, runs poorly (bogs down, stalls easily), or at the very least wastes fuel.

Japan is the largest market with about 42% market share. China is follower, accounting for about 30% market share.

The key players are Keihin Group, Mikuni, Zama, Walbro, Ruixing, Fuding Huayi, TK, DELL'ORTO, Huayang Industrial, Fuding Youli, Bing Power, Zhejiang Ruili, Kunfu Group etc. Top 3 companies occupied about 47% market share.
