Carcinoid tumor syndrome is a rare condition caused by a type of tumor called a carcinoid tumor. Carcinoid tumors are usually found in the gastrointestinal tract, but can also occur in other parts of the body such as the lungs and ovaries. These tumors produce hormones and chemicals, including serotonin, that can cause a variety of symptoms in affected individuals. Symptoms can include flushing of the skin, diarrhea, wheezing, abdominal pain, and heart palpitations.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs.
