The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Card Pliers market size was valued at US\$ 805.1 million in 2023. With growing demand in downstream market, the Card Pliers is forecast to a readjusted size of US\$ 1062.7 million by 2030 with a CAGR of 4.0% during review period.

The research report highlights the growth potential of the global Card Pliers market. Card Pliers are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Card Pliers. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Card Pliers market.

Pliers are a universal hand tool used to firmly hold onto objects.

Hand tools are tools and equipment that are not electrically powered. These tools are used in everyday gardening, farming and framing. Since these tools are manually operated, their application is limited to certain tasks and skills. Moreover, the major factors driving the growth of the hand tools market include increasing demand from the automotive repair industry and technological advancements in the production of hand tools. Moreover, increasing use of hand tools in industrial applications is another factor driving the overall market growth. However, low profitability due to intense competition and lack of skilled professionals are some of the key challenges restraining the growth of the global hand tools market. Moreover, the rise in popularity of power tools and multi-functional applications is expected to hamper the growth of this market over the forecast period. Moreover, the recovery of the construction industry is expected to drive the

demand for hand tools. According to our study, the global hand tools market size is estimated at USD 25 billion by 2022.

Key Features:

The report on Card Pliers market reflects various aspects and provide valuable insights into the industry.

Market Size and Growth: The research report provide an overview of the current size and growth of the Card Pliers market. It may include historical data, market segmentation by Type (e.g., Working Pliers, Special Pliers), and regional breakdowns.
