The report requires updating with new data and is sent in 48 hours after order is placed.

The global Carton Live Storage (CLS) Systems market size is predicted to grow from US$ 693 million in 2025 to US$ 923 million in 2031; it is expected to grow at a CAGR of 4.9% from 2025 to 2031.

Carton Live Storage (CLS) systems offer many benefits over static shelving including automatic stock rotation and improved picking productivity.

By condensing the pick face and reducing the distance order pickers need to walk when assembling orders, Carton Live Storage helps you save space and time.

Cartons are stored on inclined tracks with rollers. When a carton is removed, the carton immediately behind it gently rolls into position at the front, ensuring automatic stock rotation and the constant availability of stock for picking.
