The global Cartridge Pre-filter market size is predicted to grow from US\$ 2905 million in 2025 to US\$ 4900 million in 2032; it is expected to grow at a CAGR of 7.8% from 2026 to 2032.

A cartridge pre-filter is a replaceable filtration component used as the first-stage filtration unit in liquid or air filtration systems to remove coarse particles, sediments, rust, and suspended solids before the fluid reaches finer downstream filtration stages. These filters typically use cylindrical cartridges made from materials such as polypropylene, polyester, activated carbon, or pleated synthetic fibers, housed within filter vessels designed for easy replacement and maintenance. Compared with final-stage filters, cartridge pre-filters primarily focus on removing larger contaminants to protect downstream filtration membranes, pumps, and sensitive equipment from clogging or damage. From a value chain perspective, upstream includes polymer filtration media, nonwoven fabrics, activated carbon materials, plastic housings, and sealing components; midstream focuses on cartridge forming, pleating, bonding, assembly, and quality testing; downstream demand comes from industrial water treatment plants, HVAC systems, municipal water filtration systems, food processing facilities, pharmaceutical manufacturing plants, and residential water purification systems. In 2025, the average selling price of cartridge pre-filters is approximately US\$22.00 per unit, with global sales volume reaching around 135 million units. The industry maintains a gross margin of 28%-42%, supported by recurring replacement demand and expanding filtration applications.

Increasing water quality regulations and industrial filtration requirements are driving demand for pre-filtration solutions. Cartridge pre-filters are widely used to extend the lifespan of downstream membrane filtration systems such as reverse osmosis and ultrafiltration. The trend toward modular filtration systems and easy maintenance designs is further boosting adoption across industrial and commercial sectors.
