## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Casino playing cards are specialized cards used in gambling establishments, designed for durability, security, and consistent performance during extensive use. These cards are typically made from high-quality plastic or plastic-coated paper, which ensures they withstand frequent handling and shuffling. They often feature clear, easy-to-read indices and standardized designs to prevent cheating and ensure fairness. Additionally, casino playing cards may have security features such as unique markings or embedded RFID tags to track their use and prevent counterfeiting. They are usually sold in packs of 52, often with the casino's logo or branding, and are replaced frequently to maintain optimal game integrity.

The global Casino Playing Cards market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
