The global Cast Vinyl Film market size is predicted to grow from US\$ 814 million in 2025 to US\$ 1110 million in 2031; it is expected to grow at a CAGR of 5.3% from 2025 to 2031.

Cast vinyl is a high-end self-adhesive vinyl wrap. Cast vinyl is mostly used for vehicle wraps or applications when a high-quality finish is required. Cast vinyl is more expensive than calendered films due to the manufacturing process.

According to our research, the global packaging films market size is estimated to be around \$144 billion by 2022. The key to the continued growth of packaging films is their affordability, universal convenience, light weight, and sustainability. Being the preferred packaging solution for several industries, packaging films are also expected to grow further during the forecast year. Polyethylene (PE) will remain the leading segment with a dominant market share of 5% by 2021. With a market share of nearly 36%, the PE films business holds the largest share of the global packaging films market, and the food and beverage industry is expected to remain the most used segment of the packaging films market through 2032.
