The global Casualty Treaty Reinsurance market size is predicted to grow from US\$ 20000 million in 2025 to US\$ 33020 million in 2032; it is expected to grow at a CAGR of 7.6% from 2026 to 2032.

Casualty treaty reinsurance is a contract between a ceding insurance company and a reinsurer agreeing to accept the risks of a predetermined class of policies for a period of time. When an insurance company underwrites a new policy, they agree to take on additional risk in exchange for a premium.

The market outlook for reinsurers is promising but also adds to uncertainty. The real average annual growth rate of the global reinsurance market will increase slightly from 2023 to 2025 and be slightly lower than the levels in 2020 and 2022. The main drivers were strong operating results and restoring asset values.
