Cationic styrene-butadiene latex products are mainly used for the production and processing of cationic emulsified modified asphalt. By modifying road petroleum asphalt with styrene-butadiene latex, the technical indicators such as softening point, low-temperature ductility, and viscosity toughness of the base asphalt can be significantly improved, and the road performance of the base asphalt can be improved. Adding a certain amount of styrene-butadiene latex to road petroleum asphalt can significantly improve the temperature sensing performance, high and low temperature road performance, crack resistance and aging resistance of the asphalt binder.

The global Cationic Styrene Butadiene Latex market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
