A cattle squeeze chute, often simply referred to as a 'squeeze chute' or 'cattle chute,' is an essential piece of equipment used in the handling and management of cattle, especially in farming, ranching, and veterinary practices. It is designed to safely restrain and immobilize individual cattle for various purposes, such as medical treatment, vaccination, branding, and other husbandry tasks.

The OECD estimated that global meat production increased by 5% in 2021 to approximately 339 million tons, and import amount reached 40 million tons. Major meat exporting countries such as Brazil, the European Union and the United States meet most of the import demand. The China Agricultural Outlook Report (2023-2032) shows that China's meat production and consumption have maintained growth. During the period of next ten years, with the gradual transformation and upgrading of the meat industry, the supply capacity of the livestock and poultry industry will increase, and the output will maintain growth. According to the National Bureau of Statistics, the added value of China's agriculture, forestry, animal husbandry and fishery reached ?9,258.2 billion in 2022, a year-on-year increase of 4.3%, accounting for 7.65% of GDP.
