The global Ceiling Mounted Presence Detector market size is predicted to grow from US$ 2459 million in 2025 to US$ 5265 million in 2032; it is expected to grow at a CAGR of 11.7% from 2026 to 2032.

Ceiling-mounted presence detectors are devices that use sensing technology to detect the presence of a human body. They are widely used in smart homes, security systems, and energy-saving control. They sense a person's thermal radiation, movement, or subtle life signs, such as breathing and heartbeat, through technologies such as infrared sensors, ultrasonic sensors, or microwave radars. When a person's presence is detected, the device can trigger corresponding actions, such as lighting up lights, adjusting temperatures, or sending alarm signals, thereby achieving automated and intelligent management.

At present, advanced presence detector technology is mainly in the hands of American and European companies, and the industry has a strong monopoly on technology. Global leading companies include Signify, SCHNEIDER ELECTRIC, ABB, SIEMENS, Honeywell, Hager, Legrand, Crestron Electronics, STEINEL VERTRIEB GMBH, B.E.G. Br?ck Electronic, Lutron Electronics, etc. European and American manufacturing companies have profound technical accumulation, strong comprehensive strength, obvious advantages in core patents and core technologies, occupying the high-end market of the industry and occupying most of the global market share of ceiling-mounted presence detectors. Global lighting manufacturing giant Signify occupies the largest market share, accounting for 22.90% of the global revenue market and 36.91% of the sales market in 2023. The main reason for the large gap between sales and revenue market share is that other manufacturers, such as Schneider Electric, ABB, Siemens, Honeywell and other companies, mainly use their products in building KNX

systems, and the detectors integrate other sensors (temperature and humidity, brightness, gas, sound, etc.) or use dual technology, so the unit price is more expensive. The main sales areas of ceiling-mounted presence detectors are North America and Europe, which together account for 61.73% of the global market share. The Asia-Pacific market also plays an important role in the development of the global market, especially the rapid growth in China. In 2023, China's sales volume reached 3.41 million units, and it is expected to reach 10.45 million units in 2030, with a compound annual growth rate of 18.33%. In terms of product application, non-residential fields such as office buildings occupy most of the market share. In 2023, non-residential fields accounted for 74.68% of the sales market share. At present, ceiling-mounted presence detectors are mainly used in high-end apartments and villas in the residential field. In the future, with the advancement of technology and the decline in prices, the residential field will usher in rapid growth.
