Because of the technical barriers, operating mode and capital requirements of mobile camera module. At present, the mobile phone camera module market is mainly represented by LG Innotek, Samsung Electric, Ophiguang and many other companies. The companies that focus on mobile camera module business are mainly in China, Japan and South Korea. As the market leader in mobile camera modules, LG Innotek has a global market share of about XX in 2018, with other major service providers including Samsung Motors, OFILM Group Co., Ltd., Sunnyoptical, Foxconn/Sharp, Luxshare-ict Precision Group, Q Technology (Group) Company Limited, Truly Opto-electronics Ltd., Cowell, Primax, Holitech

Namuga, Partron, MC NEX, PRIME-OPTO

etc. The types of mobile phone camera modules in this report can be divided into three types according to the pixels of camera modules, which are less than 8M, 8M-13M and more than 13M. According to the survey results in 2018, 800 million mobile camera modules below 8M were shipped, 2.4 billion between 8M and 13M, and 1.6 billion above 13M. In the future, mobile phone cameras will be miniaturized, specialized and intelligent. The full screen further increases the need for miniaturization, currently achieved mainly through packaging technology. Module manufacturers with relevant technologies will be more competitive in the future. The development of pixel, chip, lens, software and other aspects continues to improve the professionalism of mobile phone cameras. In the future, the simple pursuit of high pixels will be changed to the development path of high pixels + dual-camera + algorithm and 3D camera + algorithm. The camera will also be combined with artificial intelligence to become an

important part of mobile phone artificial intelligence. At the same time, technology-driven, large module factories are the first to benefit from the advantages of brand and scale. Functional and differentiated innovations, represented by dual-camera, 3D camera and flexible display in the field of optics, are emerging one after another, which continue to benefit the leading camera module enterprises with strong independent innovation ability and industrial integration and scale advantages. On the other hand, with the double taken gradually to the low-end market penetration, two, three line camera module, competition intensified, early, double SheCheng the boundary between the first and second line camera module manufacturer, with research and development strength, customer base, a line of manufacturers to grab a tuyere, actively cooperate with the domestic terminal manufacturers to join to the 3 d camera in the supply chain system. As the downstream smartphone market of mobile camera module has entered the stock market, the growth space of mobile camera module market in the next few years will mainly come from the replacement demand of high-end models with new functions and new experiences.
