The global Cementitious Grouting Materials market size is predicted to grow from US\$ 1590 million in 2025 to US\$ 2085 million in 2032; it is expected to grow at a CAGR of 3.9% from 2026 to 2032.

Cementitious grouting materials are cement-based, pre-bagged dry blends (often with graded aggregates/mineral fillers plus shrinkage-compensating and flow-control admixtures) mixed with water on site to produce a pumpable or free-flowing grout for baseplate and machinery grouting, precast joints, bridge bearings, anchorage and void filling—delivering load transfer, shrinkage compensation, and durable structural support. In 2025, global cementitious grouting materials total approximately 2,500 kilotons in annual shipments, with an average ex-works price of about USD 650 per ton, installed capacity around 3,800 kilotons per year, and a materials gross margin of 15%–25%.

Upstream supplies cement/mineral fillers, graded aggregates and admixtures (expansive agents, water reducers, fibers); midstream manufacturers formulate and bag pre-packaged cementitious grouts; downstream demand comes from building/infrastructure, industrial and energy sectors for baseplates, precast assembly, bearings and structural rehabilitation.

United States market for Cementitious Grouting Materials is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
