Central labs are laboratories that are liable for lab assessments and offer various types of assistance from gathering lab test reports, gene sequencing, and directing lab evaluations, to contracting courier administrations for delivering lab kits and bio samples to clinical organizations and performing drug improvement activities. The fundamental targets of a central lab administration are: to give productive and proper testing; to guarantee quality control and constant observing; to decrease costs by planning, controlling, and consolidating buying; and to support preparing in hematology, clinical science, virology and sub atomic science. The arrangement of these administrations includes a few stages: development of clinical protocols that ensure standardization in every technique performed in the lab.
