Ceramic coating piston rod has better corrosion resistance and abrasion resistance than chromium coating, and is suitable for use in harsh working environment and strong corrosive conditions. Ceramic coated piston rod hydraulic cylinders have been widely used in nuclear energy, aerospace, petrochemical and other fields in some countries. Compared with the traditional chrome coating, the ceramic coating has better performance indicators in terms of surface porosity, surface hardness, surface roughness, coating thickness, salt spray test, etc. The ceramic piston rod hoist adopts built-in digital stroke control, which is more accurate and reliable for the hoist's stroke control.
