Liquid-based cell preservation solution is the main consumable for liquid-based cytology testing technology (Thin-Cytologic Test TCT). The liquid-based thin-layer cell preparation examination system processing technology was born in the United States and other countries in 1991, and was the first to be used in gynecological cytology examinations.

The global medical device market is estimated to be US\$603.3 billion in 2023, with a compound annual growth rate of 5% expected in the next six years. Global health care expenditure currently accounts for approximately 10% of global GDP, and the proportion will continue to increase in the next few years. This is primarily due to the increasing demand for healthcare from an aging population, the rising prevalence of chronic and infectious diseases, and the expansion of emerging markets. The medical device market plays an important role in the healthcare spending industry. The medical device market is driven by a variety of factors, including increasing global demand for advanced medical services, advancements in medical technology, growing geriatric population, increasing medical expenditures, and increasing awareness of early stage disease diagnosis and treatment.
