## Abstracts

The global Chainsaws market size is predicted to grow from US\$ 3440 million in 2025 to US\$ 7389 million in 2031; it is expected to grow at a CAGR of 13.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A chainsaw (or chain saw) is a portable gasoline, electric, or battery powered saw which cuts with a set of teeth attached to a rotating chain driven along a guide bar. It is used in activities such as tree felling, limbing, bucking, pruning, cutting firebreaks in wildland fire suppression and harvesting of firewood.

A chainsaw has two main parts: a saw blade built into a chain, wrapped around a long metal guide bar, and a small, one-cylinder gasoline (petrol) engine (sometimes an electric motor powered by a cord or battery pack). The chain is a bit like a bicycle chain, running around sprockets (gear wheels designed to turn a chain) only with about 30 or so sharp teeth (made from a hardened steel alloy) mounted around it at intervals. Inside the engine, as the piston moves in and out of the cylinder, it pushes a connecting rod that turns a crankshaft. The crankshaft turns gears that are connected (through a centrifugal clutch, explained below) to one of the sprockets on which the chain is mounted—and the chain spins around.

Most manufacturers market chainsaw chains as chisel, semi-chisel, safety, full-skip, semi-skip or special purpose machines. Each type is used to cut different kinds of wood. The chisel type chain cuts faster than the other types of chains, but dulls faster. The semi-chisel type chain stays sharp longer than the chisel type and performs better in abrasive environments.

In the global Chainsaw Chains market, the main companies are Blount International, STIHL, Husqvarna and Makita, with a market share close to 40%. The main regions are Europe and the Asia-Pacific region, with a market share of over 65%. Full Chisel has the largest market share in Chainsaw Chains, exceeding 70%. The application scenarios of Chainsaw Chains are mainly concentrated in Gas Chainsaw, with a market share of over 60%.
