The charge-storage snap off diode is capable of producing very short pulses. Also known as a step recovery diode, it has a variety of uses as a pulse generator or parametric amplifier in microwave electronics. When the diode switches from forward conducting to reverse blocking, reverse current flows briefly as the stored charge is removed. The abruptness of this reverse current stop is characteristic of step recovery diodes.

The global market for Charge-Storage Snap-Off Diodes is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC Charge-Storage Snap-Off Diodes market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.
