Chewable Toothpaste is essentially a solid version of regular toothpaste. They are not a liquid nor are they a paste, they are generally a compressed powder. Often they are small, circular shaped tablets, like paracetamol or aspirin might be. Achieving the same thing as regular toothpaste, the idea is that you chew, brush and go. When bitten into, the tablet breaks and reacts to the moisture in your mouth, foaming up to create a paste which you can brush your teeth with.
