Chinese Medicine Effervescent Tablets are a new type of drug dosage form that uses traditional Chinese medicine active ingredients as the core and combines modern effervescent tablet technology. It uses the chemical reaction of organic acids (such as citric acid) and bicarbonate to quickly disintegrate when in contact with water, releasing carbon dioxide gas to form a uniform solution, which has the characteristics of fast onset, high absorption rate, and good taste. This type of product not only retains the efficacy of Chinese medicine, but also solves the problem of inconvenience in taking traditional Chinese medicine through dosage form innovation. It is especially suitable for children, the elderly and patients with dysphagia. In recent years, with the "Healthy China" policy promoting the modernization of Chinese medicine and the growing demand of consumers for convenient medication, the Chinese herbal effervescent tablet industry has developed rapidly.
