A chip breaker insert is an insert designed with a chip breaker. Chip Breaker is a smart solution for chip breaking during the turning process. A chip breaker is a critical feature found on cutting tools, particularly those used in machining processes such as turning, milling, and drilling. It is pivotal in chip control and management during metalworking operations. By interrupting and controlling the formation of chips, the chip breaker enhances machining efficiency, surface finish quality, and tool life. Its primary purpose is to prevent the chips from becoming unmanageably long, tangled, or causing damage to the workpiece or the cutting tool itself.

The global Chip Breaker Insert market size is projected to grow from US\$ million in 2023 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
