Cleanroom uses PVA (Polyvinyl alcohol) sponge and wiper materials for various critical cleaning applications in controlled environments such as semiconductor fabrication facilities, pharmaceutical laboratories, biotechnology cleanrooms, and electronics manufacturing plants. Here's how PVA sponge and wiper materials are utilized in cleanroom settings:

**Surface cleaning:** PVA sponge and wiper materials are commonly used for wiping and cleaning critical surfaces in cleanrooms, including equipment surfaces, workbenches, and floors. Their high absorbency and low linting properties make them effective for removing contaminants without leaving residues behind.

**Wafer cleaning:** In semiconductor fabrication facilities, PVA sponge and wiper materials are used for cleaning silicon wafers during different stages of the manufacturing process. They help remove particles, residues, and chemical contaminants from wafer surfaces to ensure high-quality semiconductor device production.

**Equipment maintenance:** Cleanroom equipment requires regular cleaning and maintenance to prevent particle generation and ensure optimal performance. PVA sponge and wiper materials are suitable for cleaning sensitive equipment components, such as chambers, optics, and sensitive surfaces, without causing damage or leaving residues.

**Spill cleanup:** In cleanroom environments where chemical spills or contamination incidents occur, PVA sponge and wiper materials can be used to quickly absorb and

clean up spills while minimizing the risk of cross-contamination.

Controlled solvent applications: PVA sponge materials can be impregnated with cleaning solvents or chemicals for controlled cleaning applications in cleanrooms. This allows for precise application of cleaning agents while minimizing solvent waste and environmental impact.

Overall, PVA sponge and wiper materials are essential tools for maintaining cleanliness and controlling contamination in cleanroom environments, contributing to the production of high-quality and reliable products in industries where cleanliness is paramount.
