## Abstracts

The global Cleaning Robot for PV Industry market size is predicted to grow from US\$ 281 million in 2025 to US\$ 642 million in 2032; it is expected to grow at a CAGR of 12.8% from 2026 to 2032.

The solar panel automatic cleaning robot market is growing on the account of increasing technological advancement in renewable energy and robotics industries. These panels are important component of solar power generation systems. Their efficiency is directly linked to their cleanliness, so it is important to clean the dust, bird droppings, and other debris that get accumulated on solar panels over time. The dirt on solar panel can reduce their efficiency and overall energy output. The manual cleaning of solar panels is time-consuming and can pose safety risks for workers. This factor is creating high demand for solar panel automatic cleaning robot, therefore fuelling market growth.
