Cleanrooms are controlled environment rooms with low levels of pollutants such as microorganisms, dust, chemical vapors and others. Cleanrooms are used in a wide range of industrial processes, where pollutants may obstruct and depreciate the quality of production. Cleanroom doors are vital section of cleanrooms. Cleanroom doors with poor quality may cause alteration and degradation of the quality of products manufactured in cleanrooms. Cleanroom doors are airtight with high cycle speed that keep the cleanrooms sterilized. In healthcare industry, cleanrooms are used in manufacture of pharmaceutical drugs, medical devices and also in research activities. Cleanrooms are classified according to the size and number of particles allowed per volume of air. Cleanrooms in different countries are governed under guidelines and regulations laid by regional agencies. The cleanroom doors market is largely driven by burgeoning demand for pharmaceutical and medical devices products globally. Various pharmaceutical products, such as injections, vaccines, and ointments, need to be prepared in particulate and microbe free environment. Also, the medical devices, such as surgical equipment and implantable devices need to be manufactured in sterilized conditions with minimal pollutants. Regulations have been implemented globally concerning the manufacturing of pharmaceutical, medical device and biotechnology products in cleanrooms. These regulations focus on the manufacturing of high quality products that are contaminant free and can be used without the threat of infection.

Increasing adoption of roll up doors and swing doors is anticipated to drive the growth of these segments in the global cleanroom doors market. In terms of end users, the cleanrooms market has been categorized into pharmaceutical companies, biotech & medical device companies, research laboratories, and hospitals. Geographically, North America accounts for a significant share in the market for cleanroom doors owing to extensive research and development activities in the region. Presence of many pharmaceutical manufacturing companies and research laboratories is expected to propel the growth of the North America cleanroom doors market.
