The report requires updating with new data and is sent in 48 hours after order is placed.

A cloud adoption roadmap is a really important tool, as it serves to visualise and communicate your plans to all key stakeholders in your organisation. The important part of the roadmap is to ensure you have a clear 1 page visual outlining the key milestones and decisions points, backed up by clear definitions behind the roadmap of what each component on the roadmap means. My suggestion is to use a modelling tool to create your roadmap and my top pick is the Abacus tool from Avolution.
