According to our LPI (LP Information) latest study, the global Cloud Managed Wi-fi market size was valued at US\$ 3238 million in 2023. With growing demand in downstream market, the Cloud Managed Wi-fi is forecast to a readjusted size of US\$ 9097.8 million by 2030 with a CAGR of 15.9% during review period.

The research report highlights the growth potential of the global Cloud Managed Wi-fi market. Cloud Managed Wi-fi are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Cloud Managed Wi-fi. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Cloud Managed Wi-fi market.

Cloud Managed Wi-fi (Wireless LAN) provides private wireless access for people and a public WiFi network for guests in one fully managed, end-to-end solution.

Cloud-managed Wi-Fi simplifies the deployment and management of Wi-Fi networks by eliminating the need for on-premises controllers. Even small IT departments can remotely and quickly manage whole Wi-Fi-enabled campuses and buildings, guest networks, and wireless access points (APs) with cloud-managed Wi-Fi. The capacity to manage Wi-Fi, wired, and SD-WAN network infrastructure as a cloud-based service is referred to as "cloud-managed networking." Cloud-managed Wi-Fi can make it easier for shops to collect comprehensive in-store data by monitoring foot traffic, creating shopper heat maps, logging dwell time in a particular aisle, and verifying which products

were taken out of stock or returned (smart shelving). Initially, maintaining a few access points (AP) to provide wireless hotspots for a limited number of employees was all that the WLAN was responsible for. Now, however, the WLAN is required to manage hundreds of thousands of users and give complete enterprise-wide coverage. Cloud Managed Wi-fi solutions are offered by qualified service providers to manage their Wireless LAN in order to manage this new scale of wireless connectivity and to guarantee that all users have instant and safe connectivity. The complete WLAN lifespan may be covered by these solutions.
