Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The point of sale (POS) or point of purchase (POP) is the time and place where a retail transaction is completed. At the point of sale, the merchant calculates the amount owed by the customer, indicates that amount, may prepare an invoice for the customer (which may be a cash register printout), and indicates the options for the customer to make payment. It is also the point at which a customer makes a payment to the merchant in exchange for goods or after provision of a service. After receiving payment, the merchant may issue a receipt for the transaction, which is usually printed but is increasingly being dispensed with or sent electronically.

The global Cloud POS market size is projected to grow from US\$ 1348.5 million in 2023 to US\$ 3248.3 million in 2030; it is expected to grow at a CAGR of 13.4% from 2024 to 2030.
