The report requires updating with new data and is sent in 48 hours after order is placed.

According to our LPI (LP Information) latest study, the global Cloud Services Brokerage (CSB) market size was valued at US$ 10550 million in 2023. With growing demand in downstream market, the Cloud Services Brokerage (CSB) is forecast to a readjusted size of US$ 30110 million by 2030 with a CAGR of 16.2% during review period.

The research report highlights the growth potential of the global Cloud Services Brokerage (CSB) market. Cloud Services Brokerage (CSB) are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Cloud Services Brokerage (CSB). Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Cloud Services Brokerage (CSB) market.

Cloud services brokerage (CSB) is an IT role and business model in which a company or other entity adds value to one or more (public or private) cloud services on behalf of one or more consumers of that service via three primary roles including aggregation, integration and customization brokerage. A CSB enabler provides technology to implement CSB, and a CSB provider offers combined technology, people and methodologies to implement and manage CSB-related projects.

The CSB market has been segmented by platform into internal brokerage enablement and external brokerage enablement. These internal enablement platforms empower enterprises to provide a unified multi-cloud governance and management experience to
