Abstracts

The global Cloud Services Brokerage Solution market size is predicted to grow from US\$ 1273 million in 2025 to US\$ 1777 million in 2032; it is expected to grow at a CAGR of 5.0% from 2026 to 2032.

A cloud services brokerage solution is a platform that integrates and manages multi-cloud environments. It provides enterprises with a unified gateway to select, purchase, use, and manage cloud resources from different cloud service providers. Cloud services brokerage solutions typically include features such as service catalogs, self-service portals, billing and cost management, security and compliance management, and automated operations.

The industry trend for cloud services brokerage solutions is showing positive development. On the upstream side, cloud service providers are increasing their support for cloud services brokerage solutions to expand market share. On the downstream side, with the growing demand for digital transformation among enterprises, the demand for cloud services brokerage solutions is also increasing. In terms of product specifications, cloud services brokerage solutions are becoming increasingly feature-rich, covering all aspects from cloud resource selection to operational management. The future market size is expected to continue expanding, driven primarily by the prevalence of multi-cloud environments, the need for enterprises to reduce costs and improve efficiency, and the continued growth of the cloud services market.
