Cloud storage lets users store and sync their data to an online server. Because they are stored in the cloud rather than on a local drive, files are available on various devices. This allows a person to access files from multiple computers, as well as mobile devices to view, edit, and comment on files. It replaces workarounds like emailing yourself documents. Cloud storage can also act as a backup system for your hard drive.

The global Cloud Storage Systems market size is projected to grow from US\$ 5708.1 million in 2023 to US\$ 12560 million in 2030; it is expected to grow at a CAGR of 11.9% from 2024 to 2030.
