According to our (LP Info Research) latest study, the global CMP Silica-Based Slurry market size was valued at US\$ 1400.9 million in 2022. With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the CMP Silica-Based Slurry is forecast to a readjusted size of US\$ 1949.5 million by 2029 with a CAGR of 4.8% during review period.

The research report highlights the growth potential of the global CMP Silica-Based Slurry market. With recovery from influence of COVID-19 and the Russia-Ukraine War, CMP Silica-Based Slurry are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of CMP Silica-Based Slurry. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the CMP Silica-Based Slurry market.

This report studies the CMP silica abrasive slurries, cover the colloidal silica slurries and fumed silica slurries, used in Silicon Wafer CMP, SiC CMP, IC CMP, and others.

The global market for semiconductor was estimated at US\$ 579 billion in the year 2022, is projected to US\$ 790 billion by 2029, growing at a CAGR of 6% during the forecast period. Although some major categories are still double-digit year-over-year growth in 2022, led by Analog with 20.76%, Sensor with 16.31%, and Logic with 14.46% growth, Memory declined with 12.64% year over year. The microprocessor (MPU) and microcontroller (MCU) segments will experience stagnant growth due to weak

shipments and investment in notebooks, computers, and standard desktops. In the current market scenario, the growing popularity of IoT-based electronics is stimulating the need for powerful processors and controllers. Hybrid MPUs and MCUs provide real-time embedded processing and control for the topmost IoT-based applications, resulting in significant market growth. The Analog IC segment is expected to grow gradually, while demand from the networking and communications industries is limited. Few of the emerging trends in the growing demand for Analog integrated circuits include signal conversion, automotive-specific Analog applications, and power management. They drive the growing demand for discrete power devices.
