A CNC Die Sinker EDM (Electrical Discharge Machining) Machine is a precision manufacturing tool used to create complex cavities and intricate shapes in hard metals by eroding material using electrical sparks between an electrode (usually graphite or copper) and the workpiece, both submerged in dielectric fluid. Controlled by computer numerical control (CNC), the machine enables high-accuracy, repeatable machining of molds, dies, and precision components, especially where traditional milling or drilling is difficult or impossible. It is commonly used in the mold-making, aerospace, and automotive industries for producing detailed internal geometries with fine surface finishes.
