The global CNC Electric Spindles market size is predicted to grow from US\$ 1360 million in 2025 to US\$ 1936 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

This report studies the electric spindles for CNC machines market. The electric spindles also known as motor spindles, do not rely upon an external motor to provide torque and power, the motor is included as an integral part of the spindle shaft and housing assembly. This allows the spindle to rotate at higher speeds as a complete unit, without the additional limitations of belts or gears.

Global key players of Motor Spindles include FISCHER Group, Kessler, Siemens, Celera Motion, GMN, etc. The top five players hold a share about 24%. Asia-Pacific is the world's largest market for Motor Spindles and holds a share about 55%, followed by Europe and North America, with share about 25% and 14%, separately. In terms of product type, Rolling Motor Spindles is the largest segment, accounting for a share about 44%. In terms of application, Consumer Electronic is the largest field with a share about 33 percent.
