CNC high-speed combing machine is a kind of high-efficiency textile equipment controlled by CNC technology, which is mainly used for combing fibers, yarns or fabrics. Through the high-speed running combing parts (such as combing needles, combing plates, etc.), impurities, short fibers and agglomerates in fibers or fabrics are removed to ensure a more uniform fiber arrangement and improve the quality and feel of the fabric. The CNC system accurately controls various machine parameters, such as combing speed, pressure, combing time, etc., to achieve high-precision and high-efficiency production, and is widely used in textile, non-woven fabrics, fiber processing and other industries.
